Wave Rock Day Tour (Departs FRI)

Situated in the Avon Valley, York is one of Western Australia's most picturesque towns with charming architecture. This town was the first inland European settlement in Western Australia, founded back in 1831. Be sure to take a short stroll along the main town strip and see many of the old buildings which are still in use today. East of Perth you will find Wave Rock, a giant surf like landmark of multi-coloured granite which is over 2700 million year old. This natural monument is so iconic as it appears to crash into the ground below – creating a wave like landscape. Hippos Yawn is another rocky outcrop in the area, named because of its resemblance to a hippopotamus yawning. Mulka's Cave hear the Aboriginal legend of Mulka and view the imprints of his hands which can still be seen in the cave today.
